View Elective Course**

What are my mandatory courses?

5G Basics: What it's all about

Get up to speed on the basic facts of 5G, the new generation of wireless communications that is being rolled out worldwide.

Cloud Basics: Development and Basic Concepts

This course focuses basic concepts of Cloud Computing. You will learn about the definition, origin, characteristics and deployment models of Cloud Computing. Cloud architecture and two trends will also be introduced.

AI Basics: Overview of AI

An introductory course into the fundamentals of Artificial Intelligence. Spanning 7 episodes, this course covers the founding and history of AI, schools of thought, major technology directions, controversies and prospects for A.I as we know it today.

Digital Power

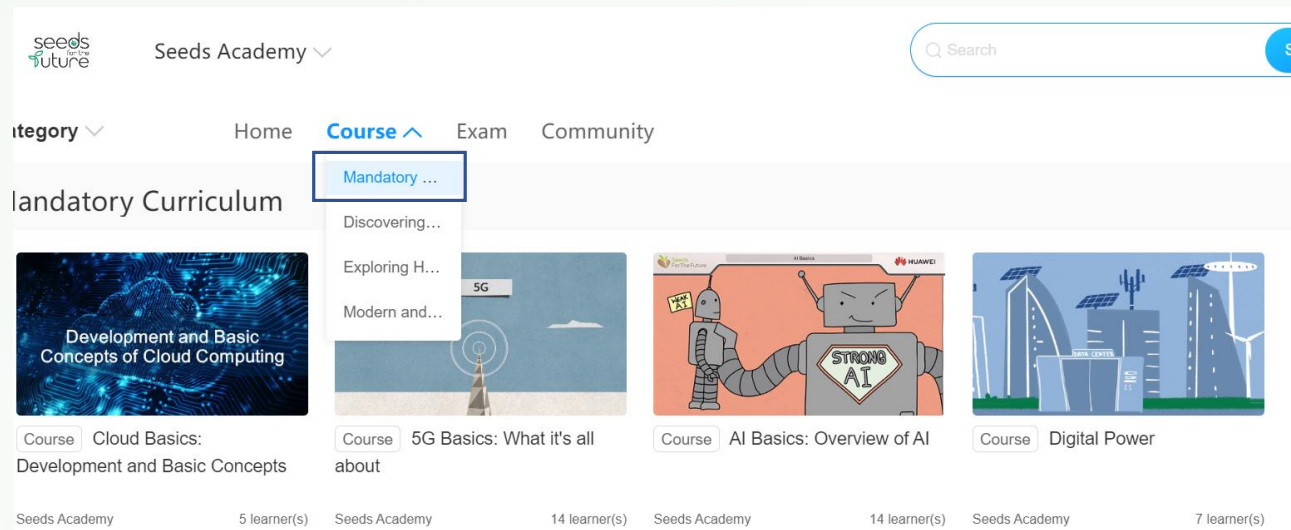

With the threat of climate change looming ever larger and more urgent, it's high time to move to a more sustainable model of energy production and consumption. Digital power is the solution
